## DESIGN SYSTEMS

#### Everything that makes up your product.

--Mark Otto, FOWA 2013 Everything.

Typography, layouts and grids, colors, icons, components, coding conventions

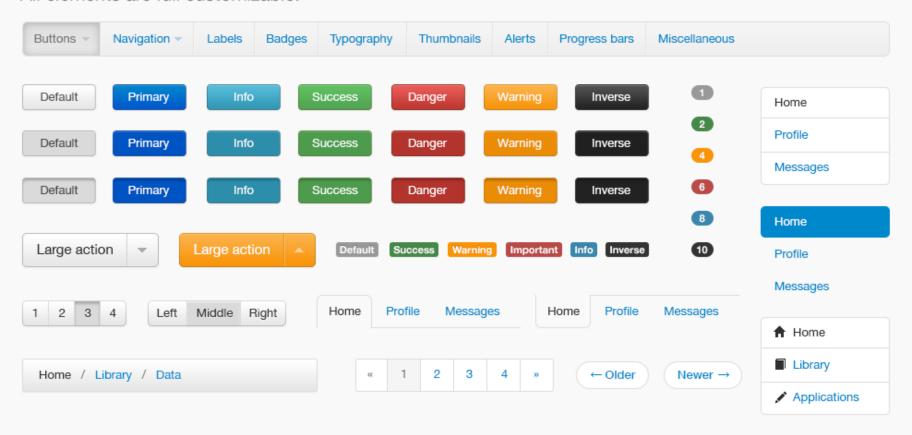

"We're not designing pages, we're designing systems of components."

--Stephen Hay

#### WHY DESIGN SYSTEMS?

Reusable work - COMPONENTS

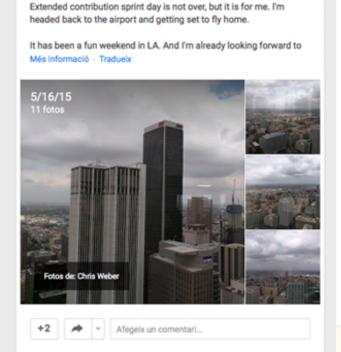

More efficient projects

Large-scale ready code

Everybody knows how everything works

Integrates multi-disciplinary workflow

## WHEN?

#### WIREFRAMES

Static wireframes vs HTML Wireframes

## STATIC WIREFRAMES

- They're abstractions
- They're full of assumptions
- They're verbose
- They're a crutch

## HTML WIREFRAMES

- They get into the browser quicker
- They reinforce the notion that you're creating a website
- They're interactive
- They allow for living, breathing annotations
- They lay the foundation for the final product

## **DESIGNING IN THE BROWSER**

- PSD/ for early planning/research phases
- The composition in the browser
- Make decisions in the browser
- Reusable work
